

Shelf Lock™ Support Quick Guide

Shelf supports are an indispensable component when it comes to protecting cabinet and shelving units. Utilize this guide to determine which fits your project specifications. Once installed, the #50 Shelf Lock™ support series can accommodate up to 80 lbs. This series, like the #55, works to keep shelving secure during transportation and installation by locking the shelf to the housing, preventing cosmetic and structural damage.

The Double Pin Shelf Lock™ Support and Heavy Duty Double Pin Shelf Lock™ Support can hold up to 300 and 500 lbs., respectively. Both are designed for industrial and institutional needs and make use of two peg holes to secure 3/4 or 1" shelves, limiting movement and damage during transportation and installation.
